राँग टर्न | WRONG TURN

| Synopsis |

Wrong Turn is a thought-provoking contemporary play that explores the complex relationship between human choices and their consequences. The narrative focuses on those defining moments in life when individuals, driven by fear, uncertainty, pressure, or haste, take a turn that irrevocably alters the course of their lives.

The characters emerge from familiar, everyday circumstances, yet the conflicts they carry within are deeply profound. As the story unfolds, the audience is drawn into the emotional and psychological spaces between the characters' past and present. Decisions that initially appear insignificant gradually reveal themselves as catalysts for conflict, fractured relationships, regret, and self-reckoning.

More than a sequence of external events, Wrong Turn is a journey into the inner lives of its characters. Each carries a burden—an unspoken truth, a lingering guilt, or an unresolved question. The silences between conversations, moments of confrontation, and emotional pauses become as significant as the spoken dialogue itself, forming the emotional core of the play.

At its heart, the play poses a compelling question: Does every wrong decision inevitably lead to downfall, or can mistakes also become pathways to self-discovery and transformation? Through this inquiry, Wrong Turn invites audiences to reflect upon the turning points in their own lives and reconsider the choices that have shaped their journeys.

Presented through a balanced interplay of realism and symbolism, Wrong Turn does not seek to impose conclusions or moral judgments. Instead, it encourages viewers to engage with the narrative through their own experiences and interpretations, leaving the theatre with questions, reflections, and insights that extend beyond the performance itself.

Written by: Ranjit Kapoor

Adapted from: The Dangerous Game by Frederick Dürrenmatt

Genre: Contemporary Drama / Psychological Theatre

Language: Hindi

राँग टर्न | WRONG TURN

| Director's Note |

Wrong Turn is not merely an incident or a story; it is a theatrical exploration of those moments in life when, often unknowingly, a person takes a turn that challenges their beliefs, relationships, and sense of self. This play seeks to capture the psychological space where human decisions collide with circumstance, creating consequences that are both unexpected and deeply revealing.

At its core, the play is not centered on any single character but on a universal human tendency—the tendency to lose direction in moments of haste, fear, pride, or uncertainty. Wrong Turn raises an enduring question: Is every mistake simply an error in judgment, or can it also become a means of uncovering truths that lie hidden within us?

*Written by **Ranjit Kapoor** as an adaptation of **Frederick Dürrenmatt's The Dangerous Game**, the play retains the suspense and moral complexity of the original while placing its characters within a context that feels immediate and relatable. Beneath its dramatic tension lies a deeper inquiry into human nature, responsibility, and the fragile line between perception and reality.*

As a director, my endeavor has been to maintain a balance between realism and symbolism. The set, lighting, silence, and music are not merely visual or auditory effects; they are integral parts of the emotional and psychological journey of the narrative. The pauses between dialogues are often as significant as the spoken words themselves, allowing the audience to engage with the unspoken tensions that drive the story forward.

In working with the actors, my focus has been less on external performance and more on revealing the internal conflicts of each character. Every individual in this play carries a struggle within—a conflict between truth and illusion, certainty and doubt, control and vulnerability. It is through these inner battles that the characters ultimately communicate with the audience.

Ultimately, Wrong Turn is a play of introspection. Rather than offering definitive answers, it invites viewers to revisit the turning points in their own lives and reflect upon the choices that shaped them. If, upon leaving the theatre, a member of the audience finds themselves reconsidering a decision, a mistake, or an unanswered question from their own journey, then this production will have achieved its purpose.
